Node Details

Market Dashboard UI

contract:ui.market_dashboard | Tracking 3 columns

Overview

Kind: contract / ui	Profile: schema_only
Status: active	Owner: frontend

Center node | Clear traces

Editable metadata

Label: Market Dashboard UI

Description: Frontend bindings used to render the dashboard cards.

Owner: frontend | Sensitivity: internal

Status: active | Profile status: schema_only

Notes:

Contract details

Contract metadata

Contract type: ui | Component: MarketDashboar

Contract fields | Add field

heroMedianPrice | Trace lineage | Suggest bindings | Remove

Field name: heroMedianPric

Sources: contract:api.frontend_market_signals

current sources: contract:api.frontend_market_signals.median_home_price

contract:api.frontend_market_signals.median_home_pri | x

Clear all

rentTrendChip | Untrace | Suggest bindings | Remove

Field name: rentTrendChip

Sources: contract:api.frontend_market_signal:

current sources: contract:api.frontend_market_signals.rent_index

contract:api.frontend_market_signals.rent_index | x

Clear all

inventoryChip | Untrace | Suggest bindings | Remove

Field name: inventoryChip

Sources: contract:api.frontend_market_signal:

current sources: contract:api.frontend_market_signals.shadow_inventory_index

contract:api.frontend_market_signals.shadow_inventory_index | x

Clear all

pricingScoreCard | Untrace | Suggest bindings | Remove

Field name: pricingScoreCa

Sources: contract:api.market_snapshot.pricing

current sources: contract:api.market_snapshot.pricing_score

contract:api.market_snapshot.pricing_score | x

Clear all

shadow_inventory_index | Trace lineage | Suggest bindings | Remove

Field name: shadow_invent

Sources: data:market_signals.shadow_inventc

current sources: data:market_signals.shadow_inventory_index

data:market_signals.shadow_inventory_index | x

Clear all

rent_index | Trace lineage | Suggest bindings | Remove

Field name: rent_index

Sources: data:market_signals.rent_index

current sources: data:market_signals.rent_index

data:market_signals.rent_index | x

Clear all

median_home_price | Trace lineage | Suggest bindings | Remove

Field name: median_home_

Sources: data:market_signals.median_home_p

current sources: data:market_signals.median_home_price

data:market_signals.median_home_price | x

Clear all

Tier 1 (must-read)

Breaking changes

- None

Removed columns

- None

Contract violations

- contract:api.market_snapshot.median_home_price: upstream field missing (data:market_signals.None).
- contract:api.market_snapshot.pricing_score: upstream field missing (computer:model.pricing_v1.None).
- contract:api.market_snapshot.shadow_inventory_index: upstream field missing (data:market_signals.None).
- contract:ui.market_dashboard.heroMedianPrice: upstream column missing (contract:api.market_snapshot.None).
- contract:ui.market_dashboard.inventoryChip: upstream column missing (contract:api.market_snapshot.None).
- contract:ui.market_dashboard.pricingScoreCard: upstream column missing (contract:api.market_snapshot.None).
- heroMedianPrice: upstream dependency is missing.
- inventoryChip: upstream dependency is missing.
- median_home_price: upstream dependency is missing.
- pricingScoreCard: upstream dependency is missing.
- pricing_score: upstream dependency is missing.
- shadow_inventory_index: upstream dependency is missing.

Tier 2 (important)

Impacted datasets

- None

Impacted APIs

- None

Tier 3 (informational)

Upstream ripple effects

- None

Potential file targets

- specs/workbench.graph.json

Blocking issues

- No blocking issues.

Warnings

- contract:api.market_snapshot.median_home_price field is not consumed downstream.
- contract:api.market_snapshot.shadow_inventory_index field is not consumed downstream.

Authoring

Create node

Kind: data | Extension type: table

Label | Description

Create node

Create edge

Source: compute:model.pri | Target: compute:transform

Edge type: depends_on

Create edge

Delete node contract:ui.market_dashboard

Import asset

Create a source + data pair from a local file, glob, directory, or object-storage pointer. If the asset is accessible, quick profiling fills the dataset automatically.

Source label | Source type: object

Source provider | Refresh

Origin kind: api_endpoint, url, d | Origin value

Series ID | Raw asset label

Raw asset kind: file | Raw asset format: unknown

Raw asset value: data/raw/file.csv or data/parts/*.parquet

Profile ready: true | Data label

Data type: raw_dataset | Persistence: cold

Update frequency | Persisted: false

Source description

Data description

Schema seed: Optional schema-only lines: column_name:data_type

Import asset into graph

Import OpenAPI

Import API contracts from an OpenAPI JSON or YAML file path, or paste the spec directly. Existing routes are updated in place, and exact column-name matches to data/compute nodes are auto-bound when the match is unambiguous.

Spec path: specs/openapi.yaml | Owner override: backend

Spec text: Paste OpenAPI JSON or YAML here

Import API contracts

Project Survey

1 Scope | 2 Assets | 3 Contracts | 4 Review

Step 1. Survey Scope

Run survey

- ○ include tests
- ✓ include workbench internals
- ✓ bootstrap assets
- ✓ bootstrap API hints
- ✓ bootstrap UI hints

Bootstrap will import 0 suggested assets, 0 visible API hints, 0 visible UI hints.

Run the survey to inspect manifests, code, docs, and accessible data assets before stepping through onboarding.
